

E - Krishi

(Complete software solution portal for farmers)

E-Krishi is a web and app based portal which helps to solve many of the problems for the farmers(users).It includes Zulip chat platform which enabled users to connect with other fellow users and agriculture professionals online and share there queries and feedback.

Users have the option to buy product related to farming and also provide a medium to recommend required product.User also get a weather forecast so that they can use it in the farming practices.Users are also provided with the tool that enables them to know the best time to sow a particular seed or crop in order to get maximum profit.In addition, users would also be presented with latest schemes of government regarding agriculture and farming.

There would also be a app based platform that provides interface to our web based platform and helps the users which do not have access to web based platform.Thus in this way, with the help of “E-Krishi” we try to minimize and solve some of the common problems faced by our farmers and make life little easier for them.
